### CAREER OVERVIEW

Matthew has over 30 years of experience in project and corporate management in the mining and metals sector. Matthew is highly experienced in the technical management of mining projects and operations from technical due diligence studies for financial institutions through to the technical requirements of plant construction, operations and upgrades. Later in his career, Matthew started his own consultancy, applying his project management and corporate advisory expertise to guide publicly listed and privately-owned companies with assets in South America through project development and operational optimisation studies.

With his operational experience, Matthew saw the benefits of Enterprise Optimisation and the superiority of the Whittle Integrated Strategic Planning process and was proud to join Whittle Consulting in 2013. As our Regional Manager Latin America, Matthew oversees Whittle Consulting activities in this region.

### QUALIFICATIONS

- Masters of Science, (Chemical Engineering), Robert Gordon's University, Aberdeen

### CAREER HIGHLIGHTS

Matthew has directed several Whittle Enterprise Optimisation studies and strategic assessments for open pit and underground mines covering such commodities as gold, copper, nickel and vanadium. Some of the clients that he has assisted during his time with Whittle Consulting include:

- PanAust Ltd with the Inca del Oro project, a gold and copper mine in Chile.
- Rio Alto Mining with the La Arena project, a gold and copper mine in Peru.
- Largo Resources Ltd with the Maracas Project, a high-grade vanadium mine situated in Brazil.
- Compania Minera Poderosa, a Peruvian gold mining company with their Marañon operation.
- Mantos Copper with their Mantoverde operation in Chile.
- IAMGold Corporation with their Rosebel gold mine located in Suriname, South America.
- South 32 with their Cerro Matoso mine, an integrated nickel laterite mine and smelter located in northern Colombia.

### MEMBERSHIPS

- Member of Canadian Institute of Mining (CIM)
